Narrative

CASE NARRATIVE

Client: AECOM

Project: Portland Harbor Pre-Remedial Design

Report Number: 580-80213-8

This case narrative is in the form of an exception report, where only the anomalies related to this report, method specific performance and/or QA/QC issues are discussed. If there are no issues to report, this narrative will include a statement that documents that there are no relevant data issues.

It should be noted that samples with elevated Reporting Limits (RLs) resulting from a dilution may not be able to satisfy customer reporting limits in some cases. Such increases in the RLs are an unavoidable but acceptable consequence of sample dilution that enables quantification of target analytes within the calibration range of the instrument or that reduces the interferences thereby enabling the quantification of target analytes.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

RECEIPT

Three samples were received on 9/10/2018 12:40 PM; the samples arrived in good condition, properly preserved and, where required, on ice. The temperature of the cooler at receipt was 1.3° C.

This report contains results for the Rinse Blank sample only.

This report contains results for PCB Congeners by Method 1668A, performed at TestAmerica Knoxville.

Note: All samples which require thermal preservation are considered acceptable if the arrival temperature is within 2C of the required temperature or method specified range. For samples with a specified temperature of 4C, samples with a temperature ranging from just above freezing temperature of water to 6C shall be acceptable. Samples that are hand delivered immediately following collection may not meet these criteria, however they will be deemed acceptable according to NELAC standards, if there is evidence that the chilling process has begun, such as arrival on ice, etc.

PCB CONGENERS

Sample PDI-RB-VV-090718 (580-80213-3) was analyzed for PCB Congeners in accordance with 1668A. The sample was prepared on 09/27/2018 and analyzed on 10/05/2018.

Several analytes were detected in method blank MB 140-24007/6-A at levels that were above the method detection limit but below the reporting limit. The values should be considered estimates, and have been flagged. If the associated sample reported a result above the MDL and/or RL, the result has been flagged.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Qualifiers

Dioxin

| Qualifier | Qualifier Description |
|-----------|---|
| C93 | The compound co-eluted with PCB-93 |
| B | Compound was found in the blank and sample. |
| C90 | The compound co-eluted with PCB-90 |
| J | Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value. |
| q | The reported result is the estimated maximum possible concentration of this analyte, quantitated using the theoretical ion ratio. The measured ion ratio does not meet qualitative identification criteria and indicates a possible interference. |
| C98 | The compound co-eluted with PCB-98 |
| C | The compound co-eluted with other compounds |
| C86 | The compound co-eluted with PCB-86 |
| C110 | The compound co-eluted with PCB-110 |
| C85 | The compound co-eluted with PCB-85 |
| C108 | The compound co-eluted with PCB-108 |
| C12 | The compound co-eluted with PCB-12 |
| C129 | The compound co-eluted with PCB-129 |
| C139 | The compound co-eluted with PCB-139 |
| C134 | The compound co-eluted with PCB-134 |
| C147 | The compound co-eluted with PCB-147 |
| C135 | The compound co-eluted with PCB-135 |
| C156 | The compound co-eluted with PCB-156 |
| C128 | The compound co-eluted with PCB-128 |
| C153 | The compound co-eluted with PCB-153 |
| C171 | The compound co-eluted with PCB-171 |
| C183 | The compound co-eluted with PCB-183 |
| C180 | The compound co-eluted with PCB-180 |
