Portland Harbor Superfund
Site, Pre-Remedial Design
Investigation Studies;
AECOM Project 60566335

Project Reference:
Sample Identification
Changes Post Data
Validation

Date:
April 3, 2019

Memo

The sample identification numbers (ID) for several sediment core samples were corrected in EQulS and project records post data validation based on internal and third-party review findings. The laboratories were not asked to provide revised laboratory reports, and associated data validation reports (DVRs) were not updated. The intent of this memo is to document the changes. The table below states the original sample ID and the corrected ID as displayed in EQulS as well as the affected laboratory groups. This memo will be included in electronic project files with DVRs and in data appendices of project reports.
