Dear Amy,

Enclosed is the revised report for the sample(s) submitted to our laboratory July 16, 2018. For your reference, these analyses have been assigned our service request number **K1806651**.

Total Solids for sample -002 was removed.

Analyses were performed according to our laboratory's NELAP-approved quality assurance program. The test results meet requirements of the current NELAP standards, where applicable, and except as noted in the laboratory case narrative provided. For a specific list of NELAP-accredited analytes, refer to the certifications section at [www.alsglobal.com](http://www.alsglobal.com). All results are intended to be considered in their entirety, and ALS Group USA Corp. dba ALS Environmental (ALS) is not responsible for use of less than the complete report. Results apply only to the items submitted to the laboratory for analysis and individual items (samples) analyzed, as listed in the report.

We apologize for any inconvenience this may have created.

### CASE NARRATIVE

All analyses were performed consistent with the quality assurance program of ALS Environmental. This report contains analytical results for samples designated for Tier IV validation deliverables including summary forms and all of the associated raw data for each of the analyses. When appropriate to the method, method blank results have been reported with each analytical test.

#### Sample Receipt:

Two sediment samples were received for analysis at ALS Environmental on 07/16/2018. The samples were received in good condition and consistent with the accompanying chain of custody form. The samples were stored frozen at -20°C upon receipt at the laboratory.

#### Semivolatiles by GC/MS:

Method ALS SOP, Organochlorine Pesticides by GC/MS/MS 09/18/2018: The upper control criterion was exceeded for 2,4'-DDD in Laboratory Control Sample (LCS) KQ1812265-03: 126, 73-122. The analyte in question was not detected in the associated field samples. The error associated with elevated recovery indicated a high bias. The sample data was not significantly affected. No further corrective action was appropriate.

Method ALS SOP, 09/18/2018: The upper control criterion was exceeded for 4'-DDE and 4,4'-DDE in Continuing Calibration Verification (CCV) MS42/091818F002. The field samples analyzed in this sequence did contain 4,4'-DDE and per client instructions has been reported from this run. The apparent problem indicated a potential high bias, the data has been flagged to indicate the exceedance.

Method ALS SOP, 09/18/2018: The upper control criterion was exceeded for Aldrin in Matrix Spike (MS) KQ1812265-01 and Matrix Spike Duplicate (MSD) KQ1812265-02. The analyte in question was not detected in the associated field samples. The error associated with elevated recovery indicated a high bias. The sample data was not significantly affected. No further corrective action was appropriate.

Method ALS SOP, Organochlorine Pesticides by GC/MS/MS 09/18/2018: The control criteria for matrix spike recovery of 4,4'-DDT for sample Batch QC were not applicable. The analyte concentration in the sample was significantly higher than the added spike concentration, preventing accurate evaluation of the spike recovery.
